

Open Box; lay out the contents.

Gather the base, four support legs, and screws.

Screw the four support legs to the base.

Set the base upright and unfold the umbrella-shaped snow holder.

Insert the bottom pole of the tree assembly– align holes on the mount and tree pole. Insert plastic-ended screw to fasten tree to base.

Use your hands to unfold and fluff out branches.

Attach top tree section by placing over the bottom pole.

Fluff top portion of the tree. The end result should look something like this.

Place tree topper on top of tree pole- make sure it is level.

String lights around tree and decorate with ornaments.

Add snow to the base.

Plug in the tree and lights. Use the controls on the base to adjust airflow and to turn on/off the music.

ENJOY!
